A MANIFESTO

PEOPLE · PLANET · PROSPERITY

I STAND WITH THEM.

I grew up watching the birds, the bees and the animals around me slowly disappear. I decided I would not stay silent.

Animals are not scenery and the planet is not ours to use up. They keep us fed, healthy and alive, and they matter for their own sake.

I BELIEVE

every animal does work for this planet that no one pays for. When they thrive, people thrive. Their lives are worth protecting, full stop.

I REJECT

the idea that nature is free to take, and profit that leaves empty skies, silent fields and poisoned rivers behind it.

I DEMAND

that we count wildlife as real wealth. Protect habitats, end cruelty in what we eat and wear, and make those who destroy pay.

I IMAGINE

a future where people and animals share the planet and prosper together, and success is measured by how alive the world is.

YOU.

This is for my generation: the students, shoppers and future makers who will decide what we buy, design and protect. You are not too small to matter. Neither is a bee.

Stand with them. Choose, speak and act for the animals, before they are gone.
